

KULSUM MALIK

Prayagraj, Uttar Pradesh

☎ 8707767816 — ✉ malikkulsum25@gmail.com — 📧 [LinkedIn](#) — 📁 [Portfolio](#)

Education

Girls' High School and College

ISC (Grade XII): 92% — ICSE (Grade X): 95%

2023

Prayagraj, Uttar Pradesh

Vellore Institute of Technology

Bachelor of Technology in Computer Science and Engineering (AI and Robotics) — CGPA: 8.12

2024–2028

Chennai, Tamil Nadu

Relevant Coursework

- Data Structures
- Database Management Systems
- Systems Programming
- Software Methodology
- Internet Technology

Technical Skills

Frontend Development: React.js, Vite, HTML5, CSS3, JavaScript (ES6+), Framer Motion, Tailwind CSS

Backend Development: Node.js, Express.js, RESTful APIs, JWT Authentication, Google OAuth, Multer

Databases & Cloud: PostgreSQL, MongoDB, Supabase, Secure UUID-based Storage, Relational Database Design

Developer Tools & DevOps: Git, GitHub, Linux, Jenkins, VS Code, Postman, Render, Vercel, GCP, Android Studio

Core Programming Languages: Java, Python, C++, C, SQL

Projects

Book My Vibe — React, Node.js, Express, MongoDB (MERN Stack)

[Live Link](#) | [Code](#)

- Built a full-stack event ticket reservation system utilizing a component-driven React frontend and robust REST API backend.
- Implemented state management with React Hooks, dynamic routing with React Router, and real-time seat availability updates.
- Designed user authentication, secure registration/login system, dynamic seat selectors, payment simulations, and a comprehensive admin metrics dashboard.

MaterialMate — React.js, Vite, Node.js, Express.js, PostgreSQL, Supabase, JWT, Google OAuth

[Live Link](#) | [Code](#)

- Built a secure full-stack document management web application allowing users to upload, organize, search, and manage study materials.
- Implemented robust security features including Google OAuth authentication, JWT-protected APIs, rate limiting, malware detection, and secure UUID-based file storage.
- Developed a responsive drag-and-drop file upload UI with Supabase PostgreSQL integration, automatic document data extraction, and ZIP processing.

ThroughU — React 18, Node.js, Express, JavaScript, TomTom API, Leaflet, JWT, Google OAuth

[Live Link](#) | [Code](#)

- Developed an advanced full-stack donor platform connecting healthcare facilities and patients with real-time organ pledges and urgent blood requests.
- Integrated TomTom Maps SDK and Leaflet API to establish smart location proximity algorithms and interactive donor-to-hospital clustering.
- Structured a robust backend system with secured endpoints using JWT authentication, custom REST routing, and dynamic data indexing.

NexVPN — React, Node.js, Express, Networking, REST API

[Live Link](#) | [Code](#)

- Architected a full-stack VPN web platform featuring dynamic, low-latency node selection, automated regional configuration loading, and simulated secure session routing.
- Designed and developed a secure backend session-management API to continuously track system connection states, active tunnel duration, and live bandwidth throughput metrics.
- Built an interactive, high-fidelity React interface with real-time feedback loops, asynchronous connection state polling, and fluid transition states.

Scalendra — React, Framer Motion, CSS Animations, LocalStorage

[Live Link](#) | [Code](#)

- Built a cinematic productivity dashboard featuring an 8-layer aesthetic stack including bokeh effects, activity heatmaps, and dynamic particle animations.
- Integrated an NLP-powered voice engine supporting natural language date commands with live transcript feedback.

Custom GUI-Based Firewall System — Python, Tkinter, Networking

- Designed a GUI-based firewall application to control and monitor network traffic with rule-based packet filtering.

Smart Vacuum Cleaner Robot — Embedded Systems, Arduino, Sensors

- Designed a robot for autonomous navigation and obstacle avoidance using sensors and microcontroller-based real-time decision-making.

Honors & Achievements

– **Top 1% Topper** – NPTEL Online Certification, IIT Kanpur

Jan–Apr 2026

Achieved a consolidated perfect score of **100%** (25/25 Assignments — 75/75 Proctored Exam) in *Forests and their Management* among 14,576 candidates.

– **Gold Medalist** – National Science Olympiad (School Level, Class XII)

Experience

Future Vineto AI Technologies Private Limited — *Software Engineering Intern*

Present

- Collaborating actively within a fast-paced startup environment, adapting to agile methodology and translating software requirements into full-stack features alongside tech professionals.

Nexus Spring of Code (NSoC) — *Open Source Mentor & Contributor*

2026

- Managing repositories and reviewing incoming Pull Requests as a Project Mentor while contributing to core codebase feature tracks.

Social Summer of Code (SSoC) – Season 5 — *Open Source Contributor*

2026

- Contributed across multiple open-source project domains, optimizing technical scripting and successfully merging structural code additions.

Leadership / Extracurricular

Technical Lead, Student Projects — *Team Lead*

- Led a team in developing software projects; guided coding practices, debugging, and ensured timely milestone completion.

Film Society — *Active Member*

- Participated in short film production, screenplay discussions, filming, editing, and post-production activities.

Science Club — *President*

- Led exhibitions, workshops, and competitions; mentored junior students in science projects and inter-school events.
